Kıymetli Sanatseverler,
Doğanın en temel yapı taşı, yaşamın ve medeniyetin ana kaynağı olan su; bugün iklim krizi, kirlilik ve bilinçsiz tüketim gibi küresel tehditlerin gölgesinde giderek daha kırılgan bir denge üzerinde durmaktadır. Bandırma Onyedi Eylül Üniversitesi Gönen Meslek Yüksekokulu olarak, akademik ve mesleki eğitimin yanı sıra, toplumsal farkındalığı artırmayı ve çevreye duyarlı nesiller yetiştirmeyi en önemli görevlerimizden biri olarak görüyoruz.

Gönen MYO Sanat Komisyonumuzun yoğun ve özverili çalışmaları sonucunda, 22 Mart Dünya Su Günü kapsamında hayata geçirdiğimiz "Gönen'den Marmara'ya Suya Bakan Göz" Uluslararası Jürili Sanat Sergisi, işte bu derin sorumluluk bilincinin bir yansımasıdır.

Gönen Ovası'na can vererek doğan, bölgemizin yaşam döngüsünü şekillendiren Gönen Çayı'nın Marmara Denizi'ne uzanan yolculuğu, aslında yerel meselelerin küresel yankılarını sembolize etmektedir. Suyun izini sürdüğümüz bu etkinlikte, dünyanın 37 farklı ülkesinden eserleriyle katılım sağlayan sanatçıların tasarımları, suyun güncel durumuna evrensel bir "göz" ile bakmamızı sağlamaktadır. Ortaya çıkan bu değerli seçki, suyu yalnızca tüketilen bir kaynak olarak değil; korunmadığında tükenen, şefkat gösterildiğinde ise çoğalan ortak bir evrensel değer olarak yeniden düşünmeye bizleri davet ediyor.

Bu anlamlı projenin vücut bulmasında emeği geçen, vizyonlarıyla sergiye ruh katan Gönen MYO Sanat Komisyonu üyelerimize, serginin küratörlüğünü üstlenen değerli akademisyenimiz Doç. Emine YALUR'A, eserleriyle sesimize ses katan tüm uluslararası sanatçılara ve jüri üyelerimize en derin şükranlarımı sunuyorum. Sanatın evrensel diliyle suyun hafızasına dokunduğumuz bu serginin, doğayla olan hassas bağımızı onarmaya yönelik güçlü bir ilham kaynağı olmasını temenni ederim.

Saygılarımla,

PRESENTATION

ADEM KORKMAZ

Director of Gönen Vocational School

Dear Art Enthusiasts,

Water, the fundamental element of nature and the primary source of life and civilization, is today standing on an increasingly fragile balance under the shadow of global threats such as climate crisis, pollution, and unconscious consumption. As Bandırma Onyedi Eylül University Gönen Vocational School, we consider raising social awareness and educating environmentally conscious generations among our foremost responsibilities, alongside academic and vocational education.

The “From Gönen to Marmara: An Eye on Water” International Juried Art Exhibition, which we have realized within the scope of World Water Day on March 22 through the dedicated and diligent efforts of our Gönen Vocational School Art Commission, is a reflection of this deep sense of responsibility.

The journey of the Gönen Stream—originating in the Gönen Plain, nourishing the region, and flowing into the Marmara Sea—symbolizes the global resonance of local issues. In this event, where we trace the path of water, the works contributed by artists from 37 different countries enable us to view the current state of water through a universal “lens.” This valuable selection invites us to reconsider water not merely as a consumable resource, but as a shared universal value—one that diminishes when neglected and flourishes when protected with care.

I would like to express my deepest gratitude to the members of the Gönen Vocational School Art Commission, whose vision and efforts brought this project to life; to our esteemed academician Assoc. Prof. Emine Yalçur, the curator of the exhibition; to all international artists who contributed their works; and to the jury members.

I sincerely hope that this exhibition, through the universal language of art, will serve as a powerful source of inspiration in restoring our delicate connection with nature.

Respectfully,

KÜRATÖRDEN

FROM THE CURATOR

EMİNE YALUR

Gönen Sanat Komisyonu Başkanı
Gönen Art Commission President

Su, yalnızca bir kaynak değil; ekosistemleri ve insan yaşamını birbirine bağlayan ortak bir yaşam alanıdır. İklim krizi, kirlilik ve aşırı tüketim bu kırılgan dengeyi giderek zayıflatmaktadır.

22 Mart Dünya Su Günü kapsamında hazırlanan bu sergi, Gönen Çayı ve Marmara Denizi üzerinden suyun yerel ve küresel ölçekteki ekolojik ve toplumsal ilişkilerini görünür kılar. Gönen Ovası'ndaki yaşamı şekillendiren bu su döngüsü, doğa ile insan arasındaki hassas bağı hatırlatır.

37 ülkeden sanatçıların katkısıyla oluşan afişler, suyun güncel durumunu görünür kılarken izleyiciyi sorumluluk almaya davet eder. Sergi, suyun korunmadığında azalan, sahip çıkıldığında ise çoğalan ortak bir değer olduğunu vurgular.

Bu sürece katkı sunan tüm katılımcılara ve sanatseverlere içten teşekkürlerimle.

Water is not merely a resource; it is a shared living space that connects ecosystems and human life. The climate crisis, pollution, and excessive consumption are increasingly weakening this fragile balance.

Prepared within the scope of World Water Day on March 22, this exhibition makes visible the ecological and social relationships of water on both local and global scales through the Gönen Stream and the Marmara Sea. This water cycle, which shapes life in the Gönen Plain, reminds us of the delicate bond between nature and humanity.

The posters created with contributions from artists from 37 countries not only reveal the current state of water but also invite the viewer to take responsibility. The exhibition emphasizes that water is a shared value that diminishes when neglected and grows when protected.

With my sincere thanks to all participants and art lovers who contributed to this process.

THE ARCHITECTURE OF SURVIVAL

Agricultural irrigation accounts for about 80% of water use and is the main driver of wetland loss.

Freshwater ecosystems cover less than 1% of the Earth's surface, yet they are true treasure troves of biodiversity. Today a quarter of all freshwater species are at direct risk of extinction.
